

ZippMat™

Swift. Smart. Sustainable.

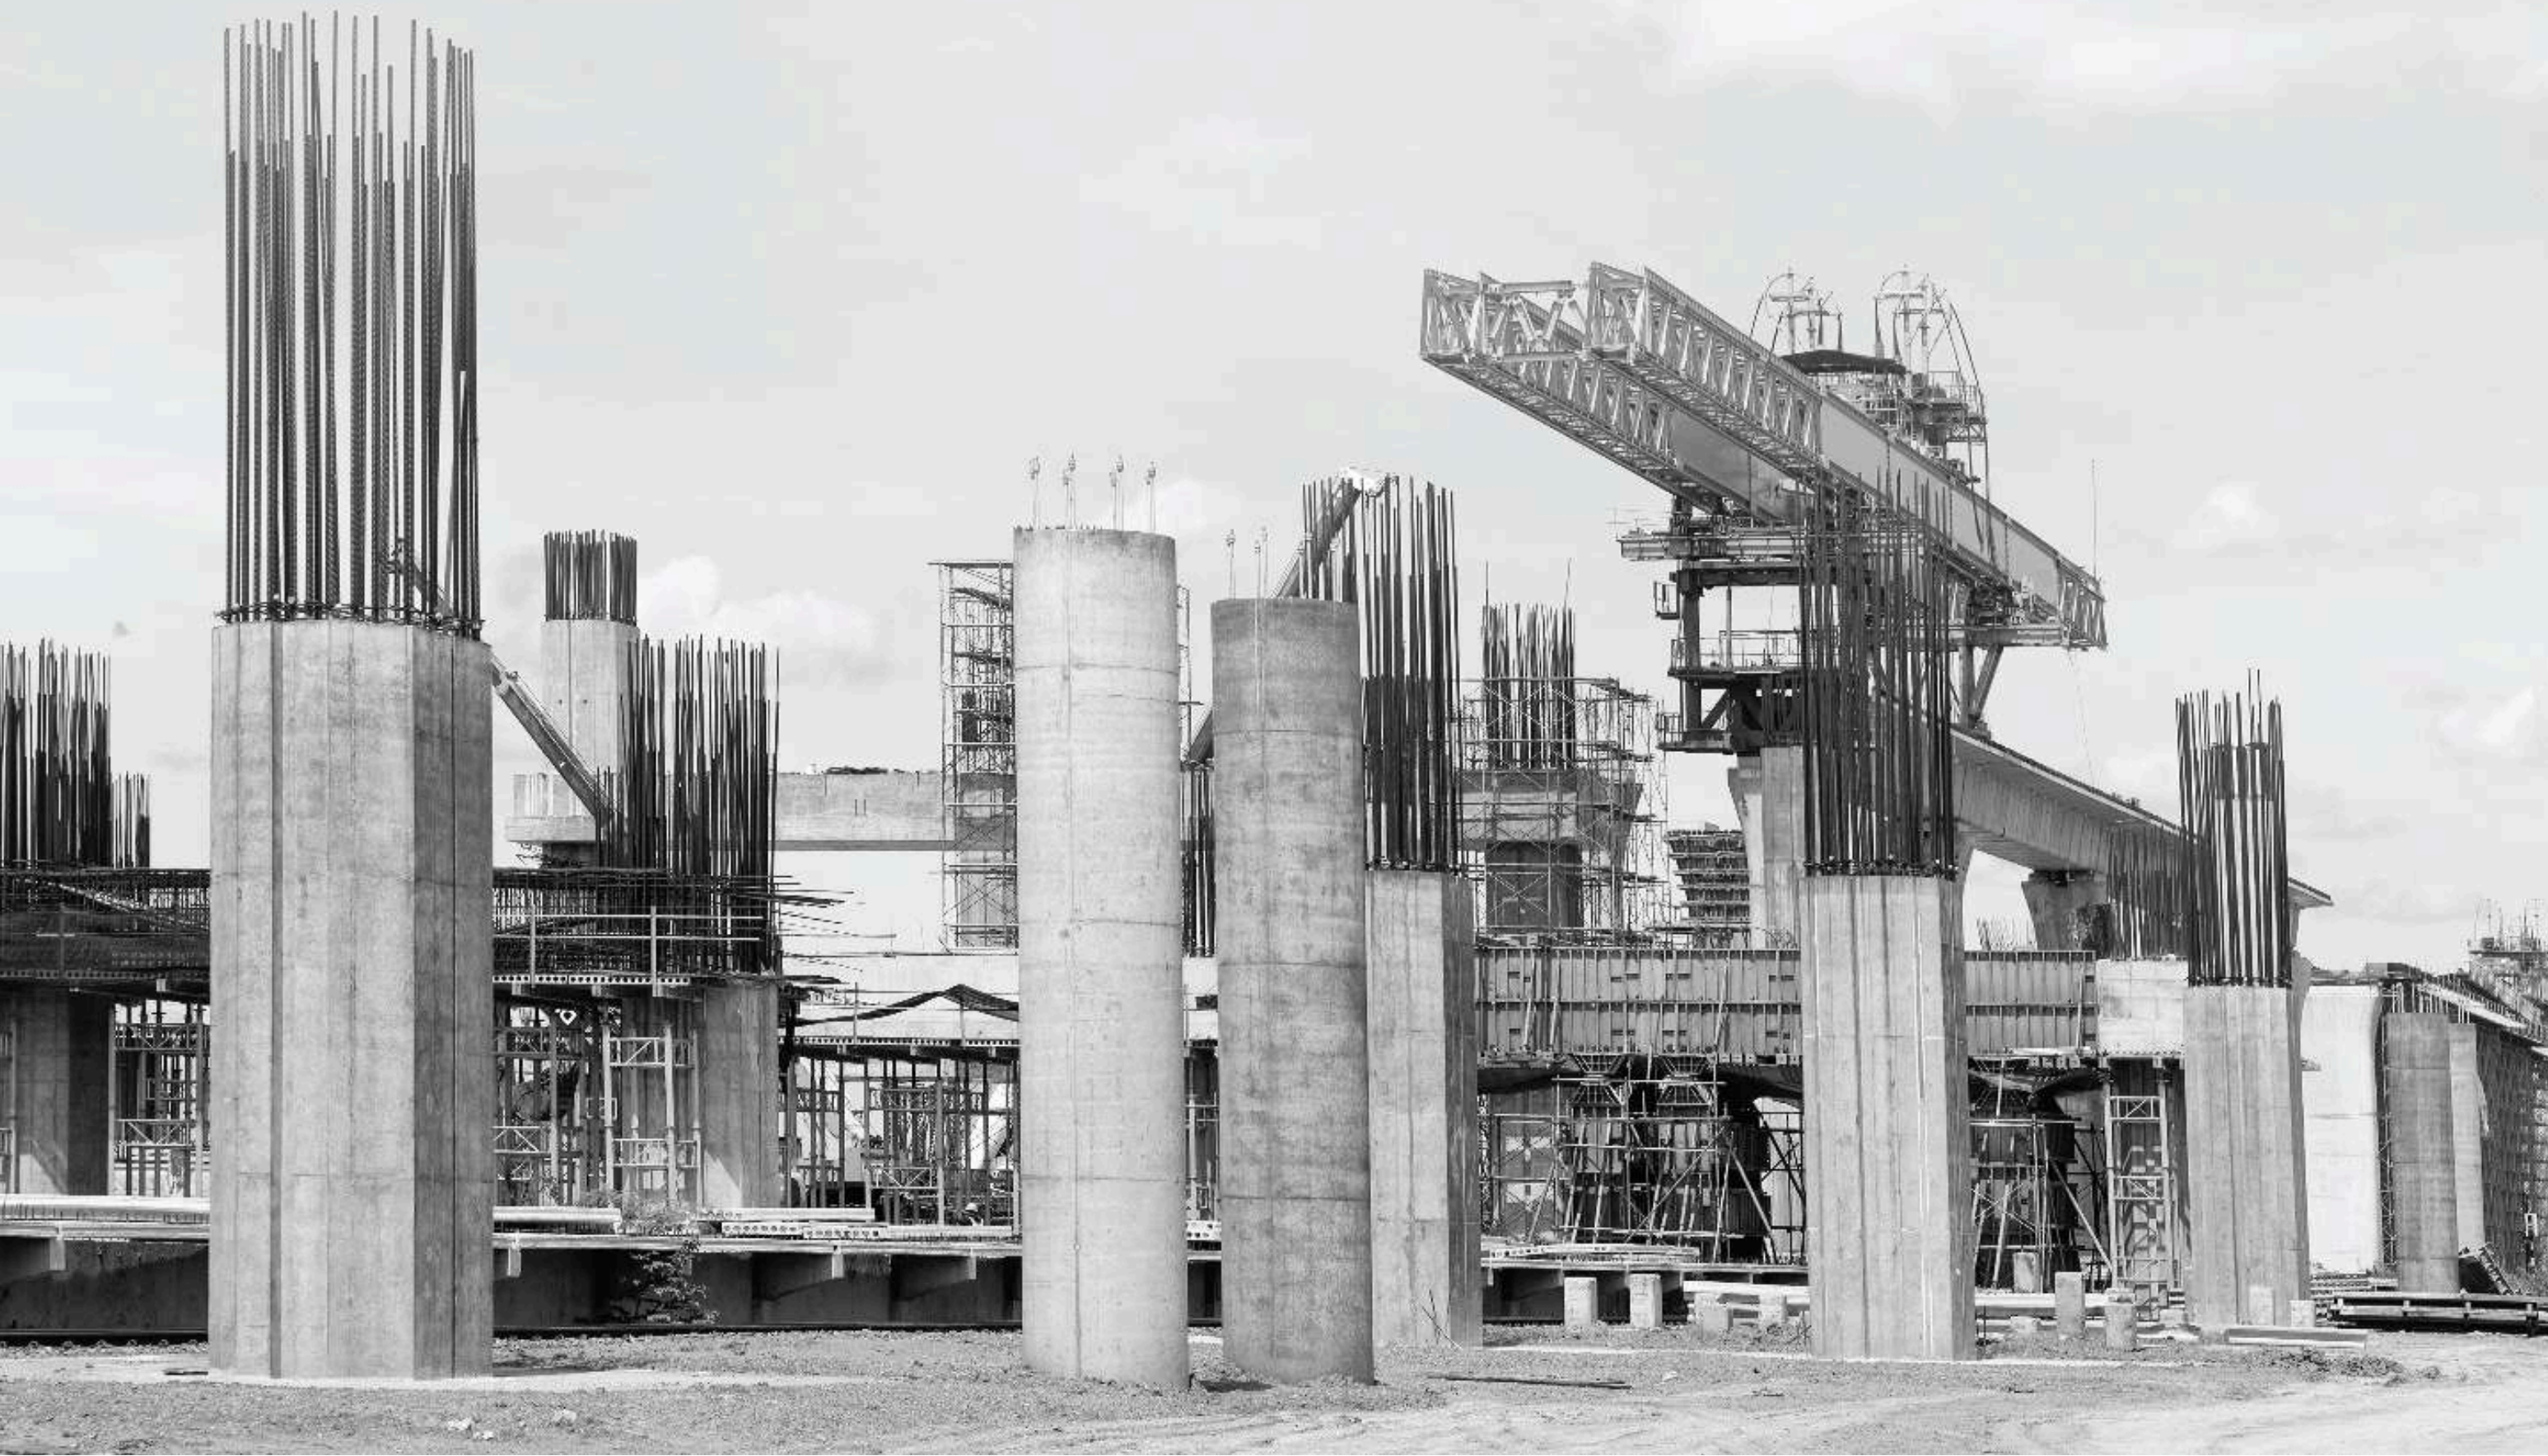

For sustainable and responsible supply chain management

ABOUT ZIPPMAT

ZippMat was born out of a bold vision: to eliminate delays, inefficiencies, and high costs in supply chains, while delivering innovative, eco-conscious products made from repurposed materials.

What began as a small team has grown into a dynamic group of 50+ professionals, all driven by a shared mission: **Faster deliveries. Smarter systems. Lower costs. Greener alternatives.**

WHY WE EXIST

We built ZippMat to bring speed, sense, and sustainability to the world of supply chains, logistics and material delivery. We're here to make things simpler, smarter, and kinder to the planet.

Since day one, our **mission** has been clear: To deliver the fastest service, the highest-quality eco-friendly products, at the most competitive prices — all while empowering supply chain with cutting-edge technology.

OUR VISION

"To redefine the future by leading the shift toward a smarter, greener, and more responsible industry—where innovation drives sustainable progress."

FOUNDER'S NOTE

Abhijeet Kudva
Co-Founder

"ZippMat started with one clear observation: supply chain management needed some improvements.

We're building one of the fastest and most dependable delivery networks in the sector. In this industry, speed and reliability aren't optional. They are everything.

Every delay costs time and money. Every inconsistency slows progress. ZippMat was built to change that, with real-time visibility, reliable execution, and products that are better, faster, and more cost-effective.

It's a system designed for the way Supply Chains and Material Delivery should work today—efficient, transparent, tech-enabled, and environmentally conscious.

This isn't just logistics. It's a better way to build."

Nandeesh Hasbi
Co-Founder

OUR GREEN PROMISE

Sustainability is at the core of everything we do. We develop intelligent, eco-friendly solutions and systems that are practical, scalable, and grounded in real-world impact. By using repurposed materials and adhering to the highest standards in sustainable manufacturing, we demonstrate our commitment to both, the planet and future generations.

Our innovations include low-emission alternatives to traditional cement, corrosion-free and stronger rebars, and reusable bitumen aligned with circular economy principles. Through optimized logistics and strategic route planning, we ensure on-time deliveries while significantly reducing fuel use and transport-related emissions.

More than a business goal, sustainability is our promise to build a better, greener future.

EKOBLEND GGBS

A smarter GGBS for a stronger, greener tomorrow.

EkoBlend, from the house of ZippMat, is a high-performance GGBS ("Ground Granulated Blast Furnace Slag") that delivers superior strength, lower costs, and longer durability—all while significantly reducing environmental impact. By repurposing industrial waste, EkoBlend not only conserves natural resources but also supports a circular economy for a more sustainable future.

www.ekoblend.com

Why choose EkoBlend GGBS?

Better Quality & Quantity Control

Our sealed bulkers ensure that there is no spillage or theft during transit, maintaining the integrity and exact quantity of every delivery.

Faster Delivery

Efficient supply chain guarantees delivery within 24 hours.

Competitive Price

Up to 30% more economical pricing without compromising on quality.

Own Manufacturing Unit

With our own manufacturing facility, we ensure consistent quality, reliable supply, and quick turnaround for custom and bulk orders.

Commitment to Sustainability

We care for the environment, which is why we offer eco-friendly EkoBlend GGBS as a sustainable alternative.

TARSHAKTI

Where strong roads meet a larger purpose.

We believe roads shouldn't just take us places, they should make us move forward, without leaving the planet behind.

TarShakti is ZippMat's promise to the future. A range of high-quality bitumen and emulsions crafted not just for performance, but for progress that's sustainable, smart, and reliable.

www.tarshakti.com

Why choose TarShakti?

24-Hour Delivery Across South India

We ensure reliable delivery within 24 hours through our robust logistics network spanning all of South India.

Competitive Price

Our products are competitively priced to ensure cost-effective solutions for your projects.

Safe and Secured Delivery

Every batch is tested, tracked, and is tamper-proof. No leakages, no losses.

Smarter Bitumen

Fewer raw materials, lower emissions, smarter surfaces. Even our emulsions are formulated to be kinder to the planet and easier to work with.

EKOBAR GFRP

Stronger than steel. Smarter than ever.

EkoBar GFRP (Glass Fiber Reinforced Polymer) is our eco-alternative for traditional steel — a smart, 4X lighter, 2X stronger, up to 30% cheaper rust-proof product built for the next gen construction.

www.ekobar.in

Why is EkoBar GFRP better than competitors?

Superior Raw Materials

Made from high-grade E-glass fibers

Higher Tensile Strength

≥ 1000 MPa, exceeding typical GFRP range (700–1000 MPa)

Certified and Compliant

ISO 9001, ASTM D7957, BIS compliant

Cost-Effective Pricing

Up to 30% cheaper than TMT

Dedicated After-Sales Tech Team

In-house engineers & consultants for expert guidance

Custom Sizes & Finishes

Options from 3mm to 50mm, custom lengths to your project needs

Proven Credibility

Widely used across NHAI projects, buildings, and warehouses today

LOGISTICS & REACH

From anywhere to everywhere. Reliably.

We've built a delivery network that keeps pace with your project, no matter where you are.

1500+ fleet vehicles and 150+ delivery partners covering major infra hubs of the nation

99.5%+ tamper-proof, tested transport for safe, reliable delivery

99.5%+ OTIF (On-Time In-Full) delivery rate

24-hours delivery promise

100% tax-compliant transparent pricing

500+ trusted certified manufacturing networks backed with certified material test reports

OTHER PRODUCTS

Structural steel-
channels, beams,
angles, steel plates

TMT bars –
primary and secondary

MS and DI Pipes

Cementitious products –
cement (all grades),
RMC, aggregates, chemicals & ad-mixtures

**Railway engineering
products**

**Site mobilization, MRO &
HSE products**
